DETAILED ACTION

The following is responsive to Applicant's amendment received March 6, 2003.

Claim 13 is cancelled. New claims 19-21 are added. Claims 1-12, 14-21 are currently pending. Claim 18 is withdrawn from consideration.

In view of Applicant's amendment, the following supplemental election of species is, respectfully, being submitted below. Applicant's amendment necessitates the following election because it requires the Examiner to consider specific polypeptide sequences or variants thereof as a component of the claimed method. This was not the case originally as the claims were drawn to treatment methods requiring the administration of heregulin peptides wherein no specific sequence was described and thus required.

Applicant's amendment and the remarks contained therein will be considered in so far as it applies to the elected species, once an election is made.

Due to the complex nature of the claims no request for an oral election is being made. Please see MPEP 812.01.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: a method for inducing hair cell generation or inner-ear-supporting cell growth, regeneration, and/or proliferation; a method of increasing the number of inner-ear-supporting cells; and a method of treating a hair cell related hearing disorder by administering an effective amount of the heregulin polypeptides set forth in

Art Unit: 1614

claims 1, 14 and 16. Each polypeptide is structurally and chemically distinct and the search for one would not be necessary for the other. Applicant is respectfully requested to elect a single species of heregulin polypeptide, e.g. heregulin beta-2 (SEQ ID NO: 5) or, for example, heregulin beta-2 variants (SEQ ID NO: 5).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 14 and 16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1614

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cybille Delacroix-Muirheid whose telephone number is 703-306-3227. The examiner can normally be reached on Tue-Fri 8:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel can be reached on 703-308-4725.
